

CHS YIELDPOINT® VARIABLE RATE APPLICATION

YIELDPOINT®

CHS YieldPoint® variable rate application will place nutrients and/or seed-utilizing, industry-leading technology to enhance the profitability of your operation. Variable rate application will also benefit your farm by creating operational efficiencies. By utilizing variable rate application, inputs will be placed where they will add the most value, thus creating economical and environmental sustainability for your farm.

By consulting with a CHS YieldPoint® specialist, you'll be collaborating with knowledgeable advisors who are committed to helping you find new ways to increase your profit per acre. Working together, we'll help optimize your water management and investment in crop protection products, fertilizer and water resources.

CHS YieldPoint® specialists can help you succeed with:

- Directing variable rate application based on customized maps
- Putting the latest precision-based equipment and technology to work on your farm
- Seeding
- Fertility
- Tiling/draining
- Tillage
- Water-use optimization

Discover the CHS YieldPoint® solution for success.

We will consult with you to help you increase profit potential with leading precision ag offerings through local experts with global connections.

Ask us about variable rate maps based on:

- Infrared
- Yield
- Grid/zone soil test results
- Electrical conductivity
- And more

CHS YieldPoint® specialists help you succeed with:

- CHS YieldPoint Sampling – Grid and zone sampling
- CHS YieldPoint Prescriptions – Planting and fertilizer prescriptions
- CHS YieldPoint Tissue Sampling – Crop tissue sampling
- CHS YieldPoint VRT Spreading – Variable rate spreading of single or double products
- CHS YieldPoint Mapping – Planter and harvest mapping
- CHS YieldPoint Water Management – Integrated system approach to maximize water use
- CHS YieldPoint Data Management – From consolidating records to evaluating performance and setting plans

Gain these benefits for your operation:

- In-depth reports on grower, farm, field or operational failures and successes
- Access to pooled data (providing a larger, more accurate database)
- Seed selection consultation gathered from multiple experiences with hybrids in your region
- Industry-leading local data on new products gathered through our YieldPoint field trials process
- Ability to manage risk with more accurate information
- Prescriptions based on local data
- Relationships with local advisors
